

# VENT WASH<sub>2</sub>O

The grease extraction ventilator is made of AISI 304 stainless steel. With its high efficiency on purifying cooking fume (93% on grease extraction and 55% on odour removal), it helps to keep the whole working environment clean and hygiene. With the waterwash system, potential fire hazard in the air duct due to grease collection and ashes from solid burning are eliminated. It can provide a safe and comfortable environment for the chef to design more creative menu.

### Other Features

- Automatically water-fill and drain
- Aluminum control tower structure
- Removable service panel
- Detachable S/S pipe, easy for maintenance
- Upper and lower slot ventilation
- Custom sizing available
- Removable water tank: Easy for cleaning
- 50Hz/60Hz model are available
- Detergent sensor
- Pressure sensor to protect the water pump
- Self-diagnostic electronic circuit

Model	Dimension (mm)			Max. Hood Length (m)	Voltage	Loading (kW)	Net Wt. (kg)	Gross Wt. (kg)
	W	D	H					
VW1001H-05	850	470	520	≤ 5m	220V/SPN	0.8	37	40
